Na to, aby sme mohli vysadiť so zajačikom Čudovačikom ihličnaté aj listnaté stromy, najskôr poorieme pôdu. Nakresli vlnivými súvislými čiarami (líniami) sprava doľava pooranú zeminu.

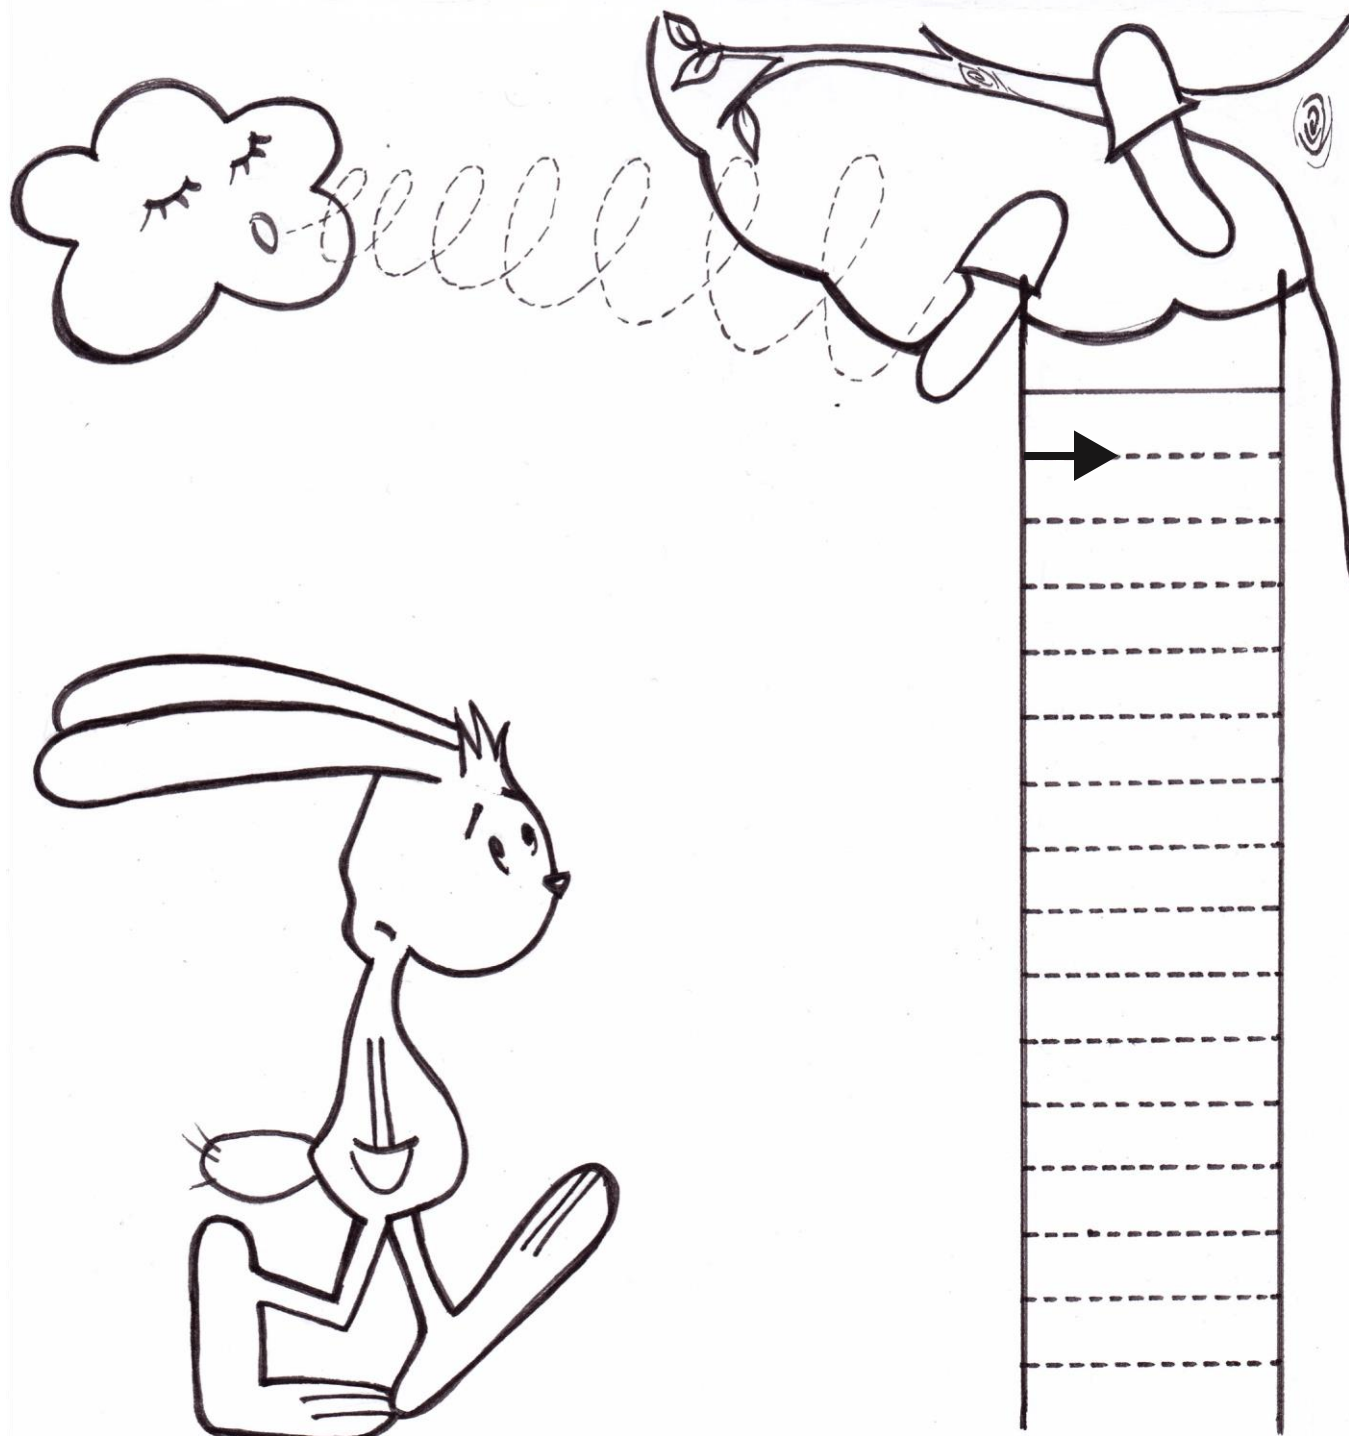

Vynikajúco! A teraz môžeš vysadiť zmiešaný les ihličnatých a listnatých stromov!

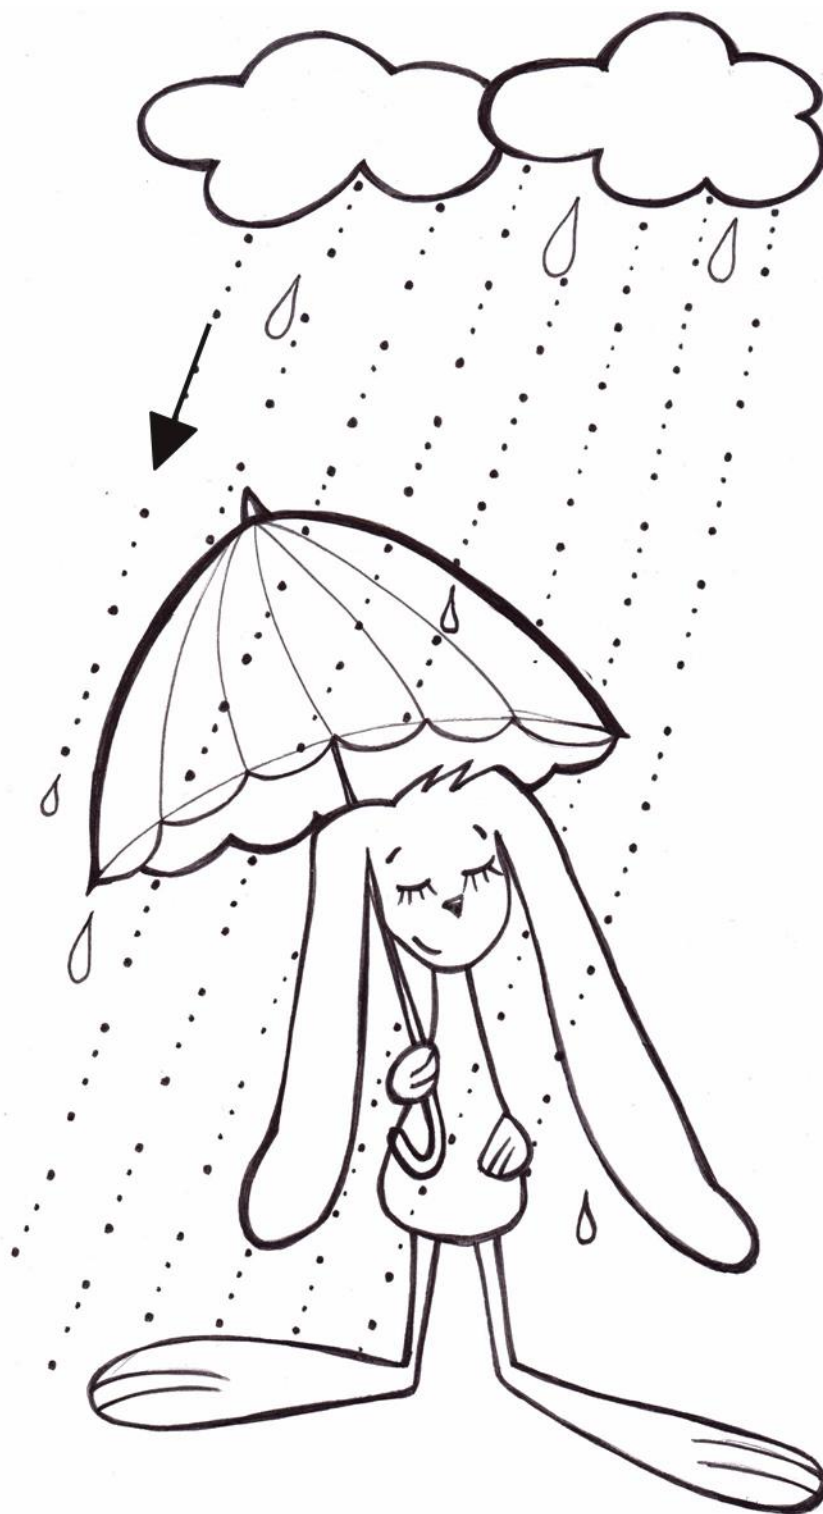

Nádhera! Na záver obrázok vyfarbi!

Dokresli rebrík, prosím, odfúklo mu papučky!

Paráda! Teraz obrázok vyfarbi!

Nakresli dážď, pred ktorým sa zajačik Čudovačik ukrýva pod dáždnikom!

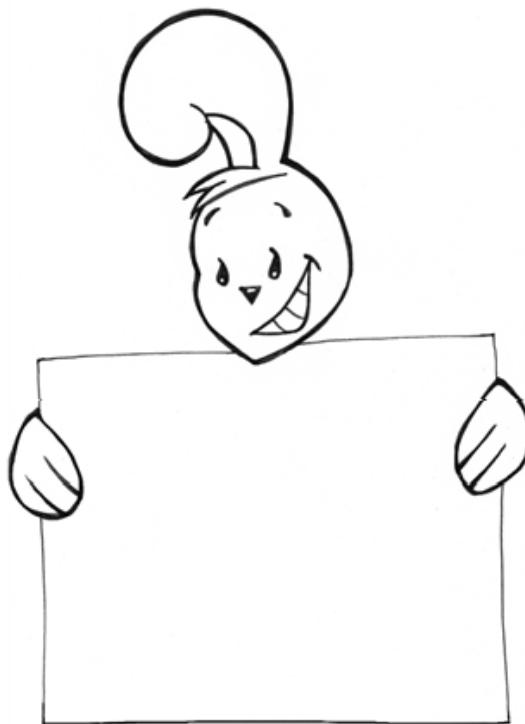

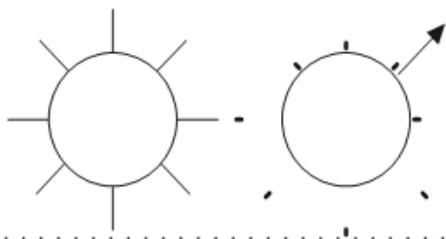

# Pomôž zajačikovi Čudovačkovi nakresliť slniečko!

V prvom riadku si nacvič kreslenie kruhu!

Výborne!

V druhom riadku dokresli slniečku lúče spájaním bodov a dokresli do konca riadka ďalšie slniečka!

Teraz, keď máš rozvietenú rúčku, dokresli zajkovi na výkres slniečko a obrázok vyfarbi!

## OPAKOVANIE LÍNII
